DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Jalili (6,209104).

In reference to claims 1, 7, 13, and 19, Jalili discloses a system and method for receiving a secure pass code from a user (abstract) comprising the steps of:

generating in a server system, an image having multiple symbols in pseudo-random locations (column 8 lines 20-25) within the image (column 8 lines 42-54);

sending the image to a client system and displaying the image on a graphical user interface (column 8 lines 42-46);

receiving from the client system, data indicating a selected portion of the image (column 8 lines 55-62);

determining an input character corresponding to the selected portion of the image and repeating the previous steps to determine subsequent input characters (column 8 lines 62-65),

wherein each generating step generates a new image with the multiple symbols in different pseudo-random locations (column 9 lines 1-10).

Art Unit: 2135

In reference to claims 2, 8, 14, and 20, the further comprising the step of combining the input characters to determine a pass code (column 8 lines 55-65).

In reference to claims 3, 9, 15, and 21, the method further comprising the steps of: combining the input characters to determine a pass code; comparing the pass code to a stored authorization code; and sending, to the client system, a result code indicating the result of the comparison (column 8 lines 60-67).

In reference to claims 4, 10, 16, and 22, the method wherein the server system authorizes money transfer operation according to the input characters (column 9 lines 58-67).

In reference to claims 5, 11, 17, and 23, the method further involves symbols representing an alphanumeric keypad (column 8 lines 23-32).

In reference to claims 6, 12, 18, and 24, the method wherein the image represents an alphanumeric keypad (column 6 line 65 to column 7 line 6).
